Our EDI 2023/2024

- We've had seven meetings as a group
- We've worked on a number of topics, including:
 - implementing the registration fee waiver,
 - creating the EDI plenary and supporting the EDI technical session,
 - Writing bylaws,
 - Creating an info sheet for convenors,
 - Creating a list of suggestions for a more inclusive and accessible conference,
 - And more!

Plenary

- Minoli Dias and Lindsay Schoenbohm gave powerful talks and discussion on EDI in the (Canadian) geosciences

Future plans

- Finalising our bylaws
- Finalising an inclusive method of bringing in new members to the EDI committee
- Create plans to make our committee more transparent (e.g., accessible meeting notes, etc)
- Streamline the registration fee waiver
- Create an EDI report yearly – with our recommendations on action
 - E.g., advertise and subsidize to bring in more students
- Plan another EDI Plenary

Anything else?

- We want to hear your thoughts! Please contact us:
 - Chat to one of the committee or email edi@cgu-ugc.ca
- We are considering running a Science Communication workshop in the Fall under the CGU umbrella open to all Canadian geoscientists to generate interest in CGU... any interest?
- We've got other plans for engagement, too!
